

WATER RESISTANT LAMINATE FLOORING

CATALOGUE
2023

CLASSEN® FLOORS FOR A BETTER TOMORROW

In the middle of the Brandenburg forest, in Baruth (near Berlin), the CLASSEN Group produces premium laminate flooring, 100 % integrated from wood cutting to the finished product. All waste materials generated in production are used either materially or thermally for the production of process energy. The laminate is manufactured in an environmentally friendly manner, developed using the latest technology and impresses with its high-quality finish. All CLASSEN laminate products bear the „Blauer Engel“ (Blue Angel) environmental seal of the German Federal Government.

We only use wood from sustainable forestry certified according to FSC® (FSC C100583) and PEFC (PEFC/04-31-0824) as well as from other controlled sources. As a rule, we obtain the wood from the immediate surrounding area in order to keep the delivery routes short.

WHY IS CLASSEN'S WATER RESISTANT FLOORING THE BEST CHOICE?

NALFA and ISO 4760:2022

The NALFA test is a standardized method to assess the water behaviour of laminate flooring. By carrying out strictly defined tests, **North American Laminate Flooring Association** determines the **48-hour resistance** of laminated panels to standing water, simulating a serious fault / failure of the water system, thus exposing the joints of the panels to swelling and irreversible damage.

CLASSEN panels have made it to the first and best NALFA result group, i.e. **no visible swelling on the surface**. We are proud of it!

SAFE flooring

Our floors can be used anywhere in the house, complex solution - for bathrooms, kitchens, pets and kids...

A minimum content of formaldehyde, CLASSEN products are a perfect solution for people who care about the safety of users.

Daily use, cleaning and splash situations no longer damage the floor!

31. megaloc

aqua protect

Water resistant laminate flooring with megaloc aqua protect is easy to install and gives you full protection.

The unique system provides reliable water resistance by preventing water from entering the joints.

LLT | anti scratch **LLT** | anti static

LLT surface, which guarantees a great appearance of the floor surface even with intensive exploitation. Safety for allergy sufferers - no dust at home! A special anti-static layer prevents the formation of electric charges on the surface.

antibacterial⁺
by CLASSEN

The surfaces of CLASSEN laminate floors have a strong antibacterial effect. It therefore awards CLASSEN laminate the „Antibacterial“ certificate according to ISO 22196.

 Friendly to warm water and electric underfloor heating systems.
